

# The real-world benefits of li-ion technology

## KEY BENEFITS

### Zero maintenance

No more battery watering. No more engine maintenance. No worries.

### Long battery life

Tennant's lithium-ion battery has a life of up to 4000 charge cycles. This means fewer battery replacements.

### Simplified operations

No need to train or learn complicated charging processes because opportunity charging does not reduce battery life.

### Safer facilities

Improve indoor air quality and reduce the risk of accidents by eliminating exposure to flammable fuels and battery acid.

### Maximized productivity

Optimize equipment uptime by spending more time cleaning and less time dealing with your power source.
