

WHY MECHANIZED CLEANING

Clean has become business critical, and here’s why: the confluence of rising standards and a growing focus on public health continues to drive fundamental shifts in the commercial and industrial cleaning industries — pushing cleanliness from a “table stakes” expectation to a true competitive differentiator for organizations across all segments.

Clean spaces impact your bottom line, period.

CLEAN MATTERS

90% of consumers say they will not consider patronizing businesses with **negative cleanliness reviews**

85% of consumers say that visible cleaning is **critically important**

25% of consumers say cleaning and sanitation is the **top factor** in choosing which businesses to visit

2.4%
increase in overall **cost of labor** in 2020

75-85%
of most janitorial budgets is **labor**

PRODUCTIVITY IS KEY

71% of managers say that improving labor productivity is a key priority

Data-driven cleaning fleets achieve **higher productivity** and **customer satisfaction**

Clean up to **3x longer** with water-reducing technology like ec-H2O NanoClean®

Cleaning with an automated scrubber is up to **64% faster** than a mop and bucket*

HEALTH & SAFETY

Typical slip-and-fall injuries cost employers **\$47,000**

150 million workdays are missed each year due to poor indoor air quality and the related health issues it causes

Mechanized cleaning machines can help **decrease 52% of airborne dust** and **40% of bacteria** found within the building

BENEFITS OF MECHANIZED CLEANING

Automated equipment, like the CS5, can save approximately **300 hours of labor** and nearly **\$4,500 in labor costs** per year**

Clean up to **13 hours a day** with robotic cleaning machines***

Floor scrubbers, like the i-mop XL Plus can delivery up to **90% cleaner surfaces** compared to conventional mopping

ATP (Adenosine Tri-Phosphate) is the name of an energy molecule that is an indicator of biological contamination invisible to the naked eye. Detection of ATP is recognized as the most reliable quantitative monitoring and inspection method to measure the effectiveness of cleaning procedures.

*Based on a floor area of 38,000 sq. ft. with a 23,000 sq. ft. cleanable area, scrubbed 7 days a week. Results are estimated and may vary.
** Based on ISSA Cleaning Times when cleaning a 2,500 sq. ft. area 5 times per week at \$15/hour
**** T16AMR can scrub up to 13 hours per day using Lithium-Ion battery option
