### 5100 KIT CONTENTS

P/N.	Description	Qty.
604745	Hour Meter 120V/230V	1

1. **FOR SAFETY:** Turn off all switches and unplug machine before installation.
2. Remove console panel from machine to access internal wiring. Do not disconnect any wiring.
3. Remove hour meter plug from panel front and replace with hour meter as shown.
4. Locate factory installed wires #5 white and #4 black from panels internal wiring. The wires will have black electrical tape wrapped around the terminal ends.
5. Remove tape from wire terminals and connect white wire #5 to hour meter terminal #2, and connect black wire #4 to hour meter terminal #1.
6. Reinstall console panel and reconnect battery cables.
7. Once brush switch is activated the hour meter display will turn on and begin accumulating elapsed time.
