Technical Service Bulletin

MODEL(S) AFFECTED: T16 AMR (Machines Equipped With Inventus 36-Volt Lithium-ion Batteries Only)

SUBJECT: Updated 36-volt lithium-ion battery charging procedures for T16AMR.

PURPOSE: Use Tennant 90-amp battery charger to only charge the lithium-ion battery 4-pack. **Do Not** use 90-amp battery charger to charge individual batteries.

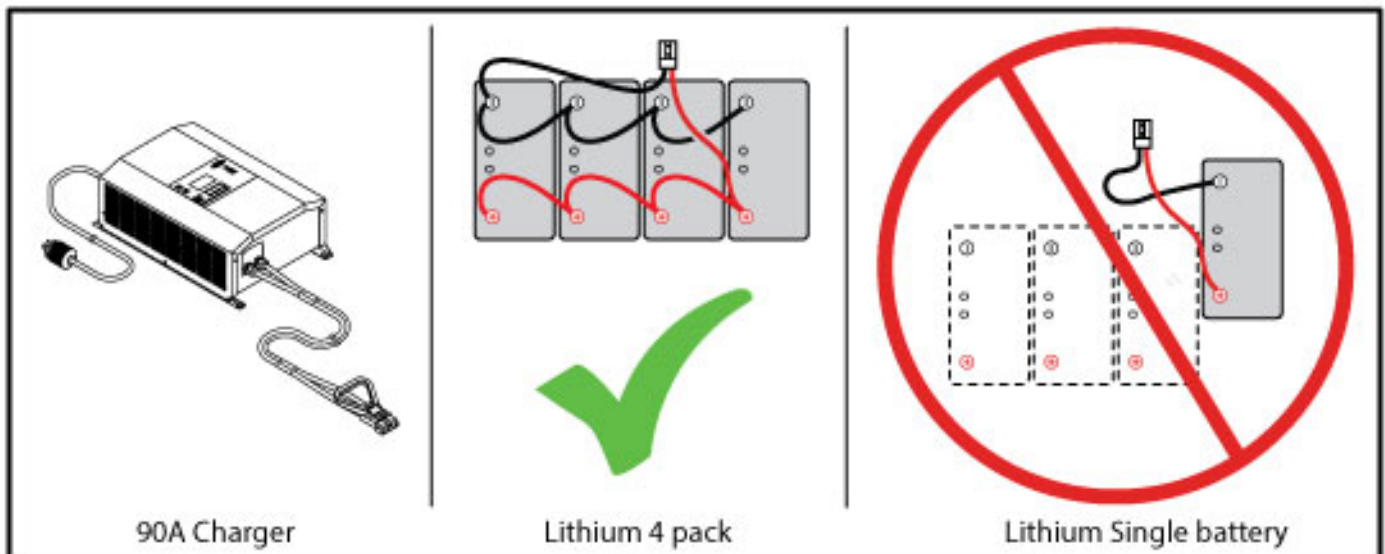

NOTES: FOR SAFETY: When servicing machine: Only charge batteries as described in the operator manual. Do not use incompatible battery chargers as this may damage battery packs and potentially cause a fire. Do not charge frozen batteries.

FOR SAFETY: When using Lithium-ion Battery model: Do not disassemble or mistreat battery. Charge lithium batteries only as a set per instructions in operator manual. If charging a battery individually, only use battery chargers rated at 40-amp or less, use only the OEM approved battery charger (part number 1242861) supplied with lithium-ion battery. Use of 90-amp battery charger (1253031) to charge individual battery could cause fire/damage to battery. Stop using or charging the battery immediately if battery has abnormal temperature, leakage, or other abnormal conditions.

IMPORTANT: The use of other battery chargers not supplied or approved by Tennant are prohibited. Refer to charger owners manual for additional information.

Questions, contact the Tennant Customer Service Department at (800) 553-8033/ TNV contact 0031 (0) 413241242.

Warranty Information: Standard warranty terms apply.
