

3090

Backpack Vacuum Cleaner

The new Tennant Model 3090 backpack vacuum cleaner is one of a kind. Its filtration rating, which exceeds HEPA requirements, and its extremely low sound level are unmatched in its class and make it the perfect vacuum for cleaning in noise and air-sensitive environments. The 3090 is perfect for use in retail facilities, schools, office buildings, restaurants and hospitals. The 3090 vacuum is equipped with a two-speed vac motor. Use the low speed for day-time cleaning in noise sensitive areas, and the high speed for cleaning at night. The lightweight aluminum telescopic wand and floor tool allow the user to clean both hard and soft floor with the flip of a switch.

Constructed of durable ABS and polypropylene that resist dents and cracks, the Model 3090 backpack vacuum is built to last.

The 3090 has triple filtration allowing it to remove 99.999% of particles @ 0.3 microns or larger, far exceeding HEPA requirements. Its filter bag alone is HEPA-equivalent, removing 99.97% @ 0.3 microns.

The Model 3090 is equipped with a fully adjustable ergonomic harness and a double insulated housing that blocks motor heat, allowing the operator to clean comfortably.

Model Number	3090
Model type	Backpack vacuum
Filtration	99.99978% @ 0.3 Microns
Sound level (2 speeds)	56/59 dBA
Sealed waterlift/airflow (max)	205 mbar/180 m ³ /hr
Vacuum motor power	1000 W
Vacuum motor type	230 V/50/60 Hz
Bag capacity	6 L
Telescopic wand diameter	32 mm
Power cord length	10 m
